

How Students Login to A+LS

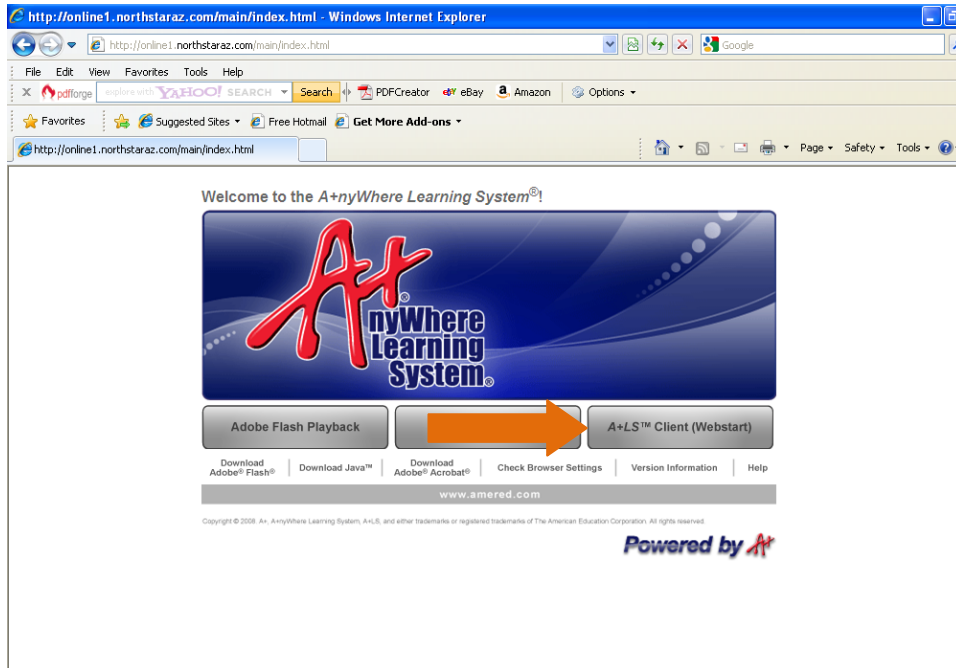

(A+LS is our Primary Computer-assisted Learning Program)

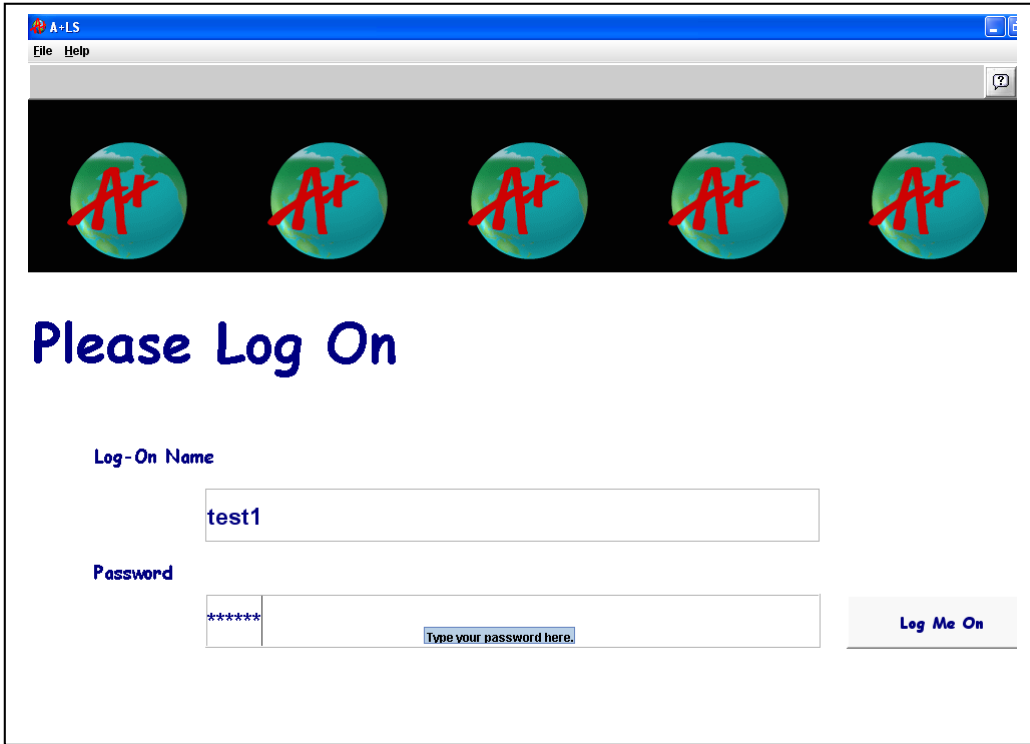

Using Internet Explorer 7.0 (or higher) students will login to <http://online1.northstaraz.com>

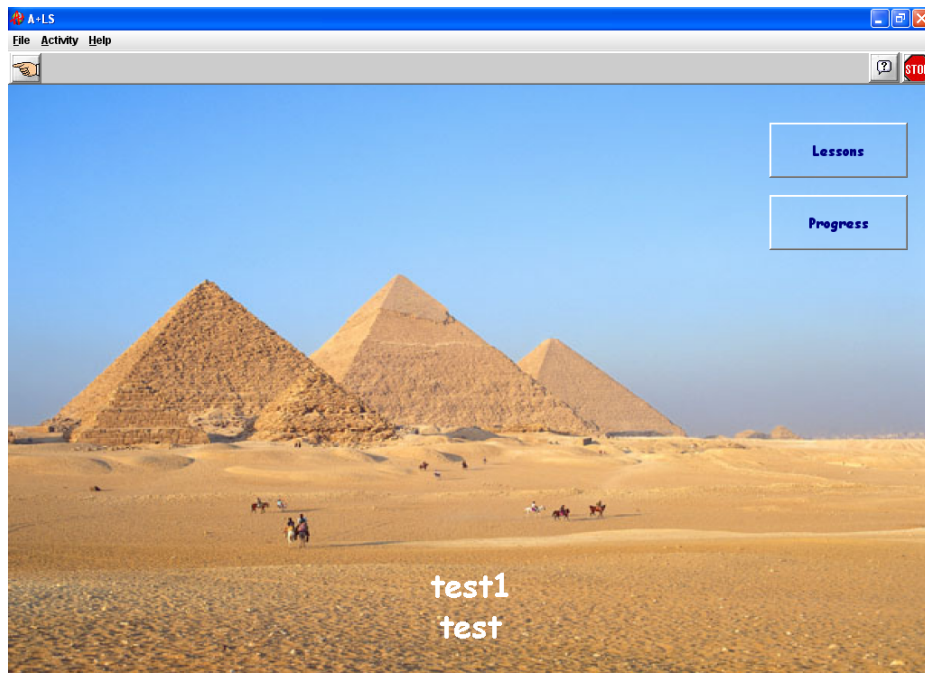

For computers that do not already have Java6 installed, students will need to download and install Java6 from this window first. This will always be true for users operating Windows 7 or Vista.

The student will then click on “A+LS Client Webstart.” For first-time users, this will install a small application on their computer. This could take up to 3 minutes.

Students will login using their pre-assigned login and password and click "Log Me On"

Once logged in, students can proceed to their lessons.
